About Us

About the Journal

The Nigerian Journal of Chest Diseases is published by the Nigerian Thoracic Society. The journal is intended to serve as a medium for the publication of research findings in the broad field of respiratory medicine in Africa, and other developing countries. It will serve as a source of information on the state of the art lung and heart diseases. Its purpose is to promote clinical and academic excellence in respiratory medicine and allied sciences. The journal will be published twice a year (June and December).
